SUPPLEMENT TO 25X1X
REPORT NO.CORRECTION

A report with the above heading, bearing the number [REDACTED] was issued on 25 July 1952. This report should be corrected to read as follows: 25X1A

A prospecting group worked in the Praded (Altwater) mountain area south of Fryvaldov (P 51/H 72) in December 1950. The informant stated that work there had progressed so far that it would be possible soon (sic) to start operations for the mining of uranium ore.¹

- 25X1A
1. [REDACTED] Comment: This is the first information to indicate uranium in the area of the Praded (Altwater) mountain. About 1949, the mining of zinc ore was resumed in mines south of the Praded mountain near Rymarov (P 50/N 89). The prospecting operations in this area may be linked with the zinc ore mining. Radio-active materials were known to exist about 30 km. west of the Praded mountain near Kraliky (P 51/H 40).
